

PROTECTING THOSE WHO PROTECT US

A soldier's job isn't the safest job. But there are things you can do to protect yourself. A big part of that is using and maintaining the safety equipment you have. Gunner Restraint Systems (GRS) from SCHROTH provide that protection.

ENGINEERED TO PROTECT – ROLLOVER, ROUGH TERRAIN & BLAST EVENTS

Initially developed by SCHROTH to meet an urgent requirement for US forces, the Gunner Restraint Systems has been deployed on nearly all US vehicle manned hatches and vehicle openings. SCHROTH offers a wide range of GRS solutions to meet your specific vehicle or application with over 200K GRS systems fielded by the US and NATO forces.

KEY BENEFITS

- The SCHROTH GRS / top cover harnesses have been developed and successfully tested to keep the standing occupant within the secure confines of the vehicle
- Over-vest and under-vest designs
- Fits 5% to 95% occupant (including body armor)
- Single point release for rapid egress

OPTIONAL PRODUCT FEATURES

- US Army standard “dual motion” buckle options available
- Berry compliant (where required)
- Available in black or tan webbing

MAIN PRODUCT FEATURES

- Multiple adjustment points for comfortable fit
- Color coded release tabs (red) for easy use
- Integrated retaining hardware to keep the extra webbing in place
- Left- and right-hand release
- Operable with gloved hands
- Mine blast/shock resistant
- Additional comfort with load spreading memory effect webbing only from SCHROTH
- UV & chemical resistant polyester material

PRODUCT DESIGN, TESTING & COMPLIANCE

- Components meet or exceed applicable ECE/FMVSS and/or FIA 8854 standards for restraint systems
- MIL-810G compliant
